Professional Summary

Computer Science (AI) undergraduate with experience building full-stack applications and AI assistants. Developed a deployed project-management platform integrating REST APIs, relational databases, and a LangGraph assistant.

Education

Manipal Institute of Technology, MAHE, Bengaluru **2023 – 2027**
B.Tech in Computer Science and Engineering (Artificial Intelligence)

Amity International School, Vasundhara Sector 1 **2017 – 2023**
Senior Secondary and Secondary Education

Experience

UZIO Technology Inc. **May 2026 – Jul 2026**
Technical Intern *Noida, India*

- Resolved UI, functional, and performance-related defects in the **AngularJS frontend** of UZIO's HRIS and payroll platform.
- Contributed to an **employee-only AI chatbot prototype** that retrieved HRIS and payroll information through existing APIs and PostgreSQL queries.
- Queried **19 PostgreSQL tables** spanning employee records, job history, time off, earnings, deductions, contributions, and taxes to support natural-language responses.

Projects

TaskBoard – Project Management Platform *May 2026 – Jul 2026*

- Built and deployed a Jira-inspired application using Next.js 15, React 19, Node.js, Express, MySQL, and Vercel, implementing **40+ REST API operations** for project, sprint, team, ticket, attachment, and admin workflows.
- Developed a **LangGraph assistant** integrating Gemini and Groq with **9 controlled tools** for retrieving and updating tickets, adding comments, and analyzing attachments.
- Designed a **12-table relational schema** with indexed relationships and **8 SQL migrations**, supporting multi-company data scoping and role-based authorization for **3 user roles**.
- Secured the backend with **JWT authentication**, bcrypt password hashing, session revocation, rate limiting, CSRF and CORS validation, structured logging, request tracing, and activity auditing.
- Implemented **Cloudflare R2 attachment storage** with presigned uploads, versioning, category and tag metadata, comments, and saved AI analysis history.

Productivity Flow Engine – ML/NLP Assistant *Nov 2025*

- Built a **machine-learning-based productivity assistant** that converted unstructured meeting transcripts into grouped, prioritized, and scheduled action items.
- Applied **text mining**, summarization, **K-Means clustering**, and **Logistic Regression** to organize related tasks and generate scheduling insights.

Technical Skills

Languages	Python, JavaScript, SQL, C
Web/Backend	React, Next.js, Node.js, Express.js, AngularJS, REST APIs
AI/ML	Machine Learning, NLP, K-Means Clustering, Logistic Regression, LangGraph, Gemini API, Groq API
Data/Cloud	MySQL, PostgreSQL, TiDB Cloud, Cloudflare R2, Vercel
Tools	Git, GitHub, Postman, Scrum

Certifications

- Machine Learning with ChatGPT: Image Classification Model – Coursera
- Introduction to Generative AI – IBM SkillsBuild
- Software Development and Agile – SAP
